**Matrix launches Aadhaar Enabled Biometric Device catering Attendance Applications of Government Organizations**

Matrix, a leading manufacturer of physical Security and Telecom solutions, has announced the launch of its cutting edge Fingerprint and RFID Card based Aadhaar Enabled Time-Attendance Terminal - COSEC VEGA FAXQ. Matrix expands its Time-Attendance portfolio to meet the functional requirements for employee time tracking system of Government organizations.

[\*\*COSEC VEGA FAXQ\*\*](#) is the first embedded Linux based Aadhaar enabled biometric device registered on AEBAS Server. This device offers unique advantages in terms of connectivity, technology, usage environment and ease of use. This device supports fingerprint as well as Mifare smart card as credential.

Designed for long term, uninterrupted performance with prudent blend of aesthetics, speed, connectivity, convenience and reliability, the device is a perfect fit for biometric time clocking system. It supports both Hindi as well as English language with auto selectable mode.

Due to its IP65 certification, COSEC VEGA FAXQ can work in extreme harsh environment and for outdoor applications. Along with wireless connectivity, this is the only device among the devices registered on AEBAS that supports wired connectivity. Hence, it can only be installed at critical areas where wireless connectivity is banned such as defense applications.

**Award Winning Design:** It is a well-engineered product with 3.5" touch screen display and multiple connectivity options in a compact design. This makes it ideal for any Time-Attendance application.

**Versatile Reader:** It supports three types of credentials - Fingerprint, RFID Card (Mifare Smart) and PIN.

**Convenience:** It is convenient to enter Aadhaar number using smart card instead of typing it on the device keypad.

**Dual Authentication Modes:** It allows the user to enter Aadhaar number through keypad (PIN) or through Mifare smart card. Its authentication modes are **PIN + Finger** and **Mifare Smart Card + Finger**.

**Speed:** Using smart card, it offers identification time of less than 1.5sec.

**Wireless and Wired Connectivity:** It offers multiple wired and wireless options to connect with the central AEBAS server in real-time using Ethernet, Wi-Fi, 3G/4G or RS485. Built-in PoE eliminates the need for local power supply and separate backup.

**Ease of Use:** With TFT LCD and intuitive user interface, it supports time clocking functions. It is simple to install and operate with multiple connectivity options and wall mounting.

### **About Matrix**

Established in 1991, Matrix is a leader in Telecom and Security solutions for modern businesses and enterprises. An innovative, technology driven and customer focused organization, Matrix is committed to keep pace with the revolutions in the telecom and security industries. With more than 40% of its human resources dedicated to the development of new products, Matrix has launched cutting-edge products like IP Video Surveillance, Access Control, Time-Attendance, Unified Communications, IP-PBX, Universal Gateways, Convergence, VoIP Gateways and GSM Gateways. These solutions are feature-rich, reliable and conform to the international standards. Having global footprints in Europe, North America, South America, Africa and Asia through an extensive network of more than 500 channel partners, Matrix ensures that the products serve the needs of its customers faster and longer. Matrix has gained trust and admiration of customers representing the entire spectrum of industries. Matrix has won many national and international awards for its innovative products.
